GitHub LinkedIn Portfolio LeetCode

EXPERIENCE

IIT Roorkee & SSF (Social Studies Foundation)

Nov 2024 – May 2025

Full Stack Intern

Internship

- Engineered a scalable web platform aggregating **government schemes, scholarships, and job listings** for marginalized communities, integrating **automated data pipelines from 10+ public sources**
- Built an **ML-assisted analytics dashboard** with automated anomaly flagging, reducing manual monitoring effort for engagement tracking across the platform
- Tech:** React.js, Next.js, Django, REST APIs, Tailwind CSS, AWS

Open Source Contributor

Oct 2024 – Present

JupyterLab, OpenStreetMap, GSSoC

Remote

- Merged **15+ Pull Requests** during GSSoC and across JupyterLab and OpenStreetMap, enhancing developer tooling and platform usability
- Developed UI components, improved documentation, and resolved bugs in AI/data science tooling
- Tech:** TypeScript, Python, React, JupyterLab Extensions, Git

PROJECTS

ShopSmart AI – Multimodal RAG E-Commerce Assistant [GitHub] [Demo]

- Engineered a **multimodal RAG pipeline** for **e-commerce discovery**, optimizing product retrieval accuracy and latency by implementing a **hybrid search architecture** that intelligently bridges inventory gaps with **autonomous web-retrieval**
- Integrated **Gemini Flash LLM** via **Groq API** for sub-second contextual answer generation, rendering structured **rich product cards** with AI-generated responses and traceable source references
- Tech:** Python, Streamlit, Gemini Vision, Groq API, LLaMA, FAISS, Sentence-Transformers

GRAVITY — Autonomous Data Fidelity Intelligence [GitHub] [Demo]

- Architected an **autonomous observability platform for GraphQL** that automates **schema-drift** and **data-fidelity analysis**, utilizing a **multi-agent LLM pipeline** to reduce manual debugging time by **60%**
- Developed a high-performance **D3.js heatmap** rendering **10,000+ data cells** with sub-**500ms** latency and achieved **98%+ accuracy** in **PII detection** with **zero-persistence architecture**, ensuring compliance-safe processing across enterprise data pipelines
- Tech:** React 18, TypeScript, Node.js, Groq AI, Llama 3, Zustand, Tailwind CSS, D3.js

EDUCATION

Newton School of Technology, Rishihood University

Aug 2023 – Jul 2027

B.Tech in Computer Science and AI

CGPA: 8.01/10

SKILLS

Languages: Python, TypeScript, JavaScript, SQL

AI / ML: RAG Pipelines, Multi-Agent Systems, LLMs, FAISS, Sentence-Transformers, Gemini Vision, Groq API, Llama 3

Web & Systems: React, Next.js, Node.js, Django, FastAPI, REST APIs, Tailwind CSS

Infrastructure: AWS, Docker, CI/CD, Git, GitHub, Vercel
